Never Again Do You Have To Worry About  
Wordpress Hackers & Bots!

"Nice!"

"I'm in."

"Alright time to do some damage."

*Yours truly,*

*-Mr. Hacker On Your Wordpress Site*

-----

Do you really want this hacker to get into your site like that?

Do you really want to risk losing all of your hard work?

Of course you don't.

No one does.

## So why does this happen so often? How are hackers so sneaky?

Answer:

BOTS.

Bots attack your site over and over, without you even knowing it.

And once they attack your site enough, your site crashes.

And once it's crashed, it's easy access for a hacker to sneak in.

Most Wordpress users don't know this. And they are in a VERY vulnerable state with their sites.

And we noticed that this is a BIG problem.

And we set out to fix it.

So we put our development team to work.

And we finally came up with the ULTIMATE "push button" solution...

Now hackers will run the other way - yes, literally.

# WP BotBlocker Is Easy As 1-2-3!

### **One Click Software**

Other software out there claims to be "1-click software" when it's really not. WP BotBlocker on the other hand truly is 1-click software. Literally click just ONE button (the 'Activate' button), and you'll be off to the races.

### **Works With Wordpress**

This software is fully compatible with your Wordpress site(s). It's easy to install and doesn't require any special configuration.

### **Automated Bot Protection**

Never again do you have to worry about bot and hacker attacks on your site. Let the power (and simplicity) of WP BotBlocker work for you on complete auto-pilot!

### **Step By Step Training Included**

The training that we're including with this software is very step by step and over the shoulder. That way you aren't scratching your head wondering what to do next..

### **Extremely Hacker Proof**

Hackers won't bother messing with your site when they see that their bots are NO MATCH for WP BotBlocker. Hackers will look elsewhere (for lower hanging fruit).

## 100% Newbie Friendly

We really built this plugin with the intention of allowing anyone (yes, anyone) to protect their site with ease. Because no one deserves to lose their hard work to hackers. Ever.

## Frequently Asked Questions & Answers

**Q: Is this *really* newbie friendly?**

Yes! We built this so that our grandparents could use it. Literally all you have to do is install it and then click ONE button and WP BotBlocker will protect your site from hackers and bots. And just in case you run into ANY problems, we have step by step training videos to guide you every step of the way.

**Q: Are there any OTOs / upsells?**

After ordering we do have a couple special offers for our awesome customers :) Just like any upsell, these purchases are optional but they definitely help take things to the NEXT level.

**Q: What license rights do I have to this software?**

For this offer on this page, you're getting personal use rights only. This means you can use this plugin for any and ALL of your own sites when you buy the Unlimited Site License.

**Q: Does this work on Mac and PC?**

Yes! Since this is a Wordpress plugin, this will work on ANY computer really :)

**Q: Do you walk me through how to install and USE this software to its full capability?**

Yes absolutely! We have included over-the-shoulder video training for you so that can easily install this software and start taking advantage of its "push button" awesomeness ;)

**Q: Do I need to do tech stuff to make this work? (coding, etc)**

Absolutely not. We built this so you wouldn't have to deal with any of that tech mumbo jumbo.

**Q: Will too many people start using this?**

We certainly hope so! Because the more people that use this, the more people that will be protected :) And the more frustrated hackers there will be - which is great!

**What types of sites can I use this on?**

WP BotBlocker works for ANY type of site: Amazon niche sites, Facebook sites, offline/local business sites, AdSense sites, affiliate review sites, sites for your own products, etc.
